PROFESSIONAL SUMMARY

Back-End & Cloud Developer with strong expertise in RESTful APIs, data modeling, and clean architectures (Node.js, TypeScript, and Java/Spring Boot). Officially certified by AWS (Cloud Practitioner), I have practical experience building microservices, implementing secure role-based access control (RBAC/Keycloak), and automating cloud workflows. I combine 3 years of hands-on IT infrastructure experience with a sharp focus on scalable code, automated testing, and solid engineering principles (Clean Architecture and SOLID).

TECHNICAL SKILLS

- **Languages & Back-End:** TypeScript, Node.js, Java, Spring Boot, Express, Fastify, SQL.
- **Architecture & APIs:** RESTful APIs, Clean Architecture, SOLID, Microservices, Messaging (RabbitMQ).
- **Cloud & DevOps:** AWS (Lambda, S3, SES, EC2, CloudWatch), Docker, Git/GitHub, CI/CD.
- **Databases & ORM:** PostgreSQL, Prisma ORM, MySQL, MongoDB, Redis.
- **Security, Integrations & Infrastructure:** Keycloak (RBAC / JWT / Authentication), React, Tailwind CSS, Linux, LAN/WAN Networks, VPNs.

PROFESSIONAL EXPERIENCE

Comigo Tech (Sempre Comigo) | Back-End & Cloud Developer / Full-Stack

October 2025 – July 2026 | On-site (Parnamirim/RN)

- **APIs and Access Control:** Designed and developed scalable RESTful APIs for the SuperApp ecosystem using Node.js, TypeScript, and PostgreSQL, structuring secure authentication and role-based permission modules (Keycloak RBAC and JWT tokens).
- **Module Automation and ORM:** Led data modeling and process automation for the affiliates module and core financial workflows, while refactoring and optimizing database queries using Prisma ORM.
- **Cloud Integrations (AWS):** Implemented automated transactional email delivery (accession, password recovery, and invites) integrated with AWS Lambda and SES, and streamlined cloud file processing using AWS S3 Pre-signed URLs.
- **Best Practices and Integration:** Collaborated on consuming and integrating backend APIs into modern React and TypeScript web interfaces, applying Clean Architecture and actively participating in Code Reviews and architectural discussions.

Compass UOL | Back-End Developer (Java/AWS)

November 2024 – April 2025 | Remote

- Development of object-oriented microservices and RESTful APIs using Java and Spring Boot.
- Implementation of asynchronous workflows and service decoupling through RabbitMQ messaging.
- Provisioning, configuration, and monitoring of cloud services on the AWS platform (EC2, S3, and Lambda).

Dois A Tecnologia | Infrastructure Tech Support

September 2021 – September 2024 | On-site

- Specialized technical support for the daily administration of Linux and Windows Server environments.
- Configuration and maintenance of corporate networks (LAN/WAN) and secure VPNs for hundreds of users.
- Management of enterprise backup routines and continuous monitoring of cloud storage solutions.

ACADEMIC BACKGROUND, CERTIFICATIONS & COMMUNITY

- **Bachelor of Computer Science** (Ongoing): UNP (Expected graduation: December 2026)
- **Official Certification:** AWS Certified Cloud Practitioner (2025)
- **Community & Leadership:** Event Staff & Active Member at **GDG (Google Developer Group) Natal/RN** (2025 and 2026 Editions).
- **Courses and Specializations:** REST API & Spring Boot (Udemy), Java Complete OOP + Projects (Udemy), Linux CentOS / Windows Server (UFRN), Digital Games Technician (IMD/UFRN).
- **Languages:** Portuguese (Native) | English (Advanced).
