

Fernando Cesar Bezerra Silva

Parnamirim, Rio Grande do Norte | (84) 98160-2864 | fbsilva08@hotmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full-Stack Developer focused on building technological solutions that generate real business results. I have a strong background in Back-End (Node.js, Java / Spring Boot) and AWS infrastructure, designing secure, scalable, and optimized systems. I apply Clean Architecture and SOLID principles daily to ensure long-term code quality, resolving flaws, and automating processes. On the Front-End (React and Tailwind CSS), I work practically to deliver fast and integrated interfaces.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Java, SQL.
- **Frameworks & Web:** Node.js, React, Tailwind CSS, Spring Boot.
- **Engineering & Architecture:** Clean Architecture, MVC, SOLID, Microservices, Serverless, RESTful APIs, Design Patterns.
- **DevOps & Cloud:** AWS (Lambda, S3, EC2, RDS, SNS, SQS, CloudWatch), Docker, Git, CI/CD (GitLab CI, AWS CodePipeline).
- **Testing:** Jest, JUnit.
- **Databases, ORM & Cache:** PostgreSQL, MySQL, MongoDB, Redis, Prisma, JPA.
- **Security:** Keycloak (IAM), JWT, RBAC.
- **Infrastructure:** Linux (Ubuntu, CentOS), Windows Server, VPNs, Local Networks (LAN/WAN).

PROFESSIONAL EXPERIENCE

Sempre Comigo | Full-Stack Developer

November 2025 – Present | On-site

- **Core and ERP Development:** Designed and developed new internal modules for the ERP and client-facing platforms, working end-to-end with Node.js, React, and Tailwind CSS, scaling features beyond the base tracking system.
- **Security and IAM:** Led the introduction and implementation of security best practices, configuring route protection, multi-tenant architecture, and role-based access control (RBAC) from scratch using Keycloak and JWT tokens, mitigating unauthorized access risks.
- **Cloud Architecture and Performance:** Architected and implemented new features integrated with AWS services, such as automating transactional email delivery using AWS Lambda and SES, and optimized application performance through AWS S3 Pre-signed URLs, significantly reducing server processing bottlenecks.
- **Software Engineering:** Refactored legacy systems focusing on Clean Architecture and SOLID, correcting critical business rule flaws, in addition to ensuring application stability with unit and integration tests using Jest.

Compass UOL | Back-End Developer (Java/AWS)

November 2024 – April 2025 | Remote

- Development of resilient microservices and RESTful APIs with Java and Spring Boot.
- Implementation of asynchronous messaging with RabbitMQ (concepts applicable to AWS SQS/SNS).
- Provisioning and scaling of AWS resources (EC2, S3, Lambda) in production environments.

Dois A Tecnologia | Infrastructure Tech Support

September 2021 – September 2024 | On-site

- Infrastructure technical support and management of corporate VPNs.
- Administration of Windows Server and Linux servers.
- Management of backups and cloud solutions (AWS, Google Drive, OneDrive).

ACADEMIC BACKGROUND

- **Bachelor of Computer Science** (Ongoing): UNP (Expected graduation: December 2026)
- **Technical Degree in Digital Games:** IMD/UFRN (2017 – 2019)

CERTIFICATIONS AND COURSES

- AWS Certified Cloud Practitioner (2025)
- REST API and Spring Boot – Udemy (2025)
- COMPLETE Java (OOP + Projects) – Udemy (2024)
- Windows Server and CentOS – UFRN

LANGUAGES

- **Portuguese:** Native
- **English:** Advanced
